Annual Report Form 2 (AR-2)
County Demographic Worksheet
for Fiscal Year 2013-2014 (July 1, 2013 - June 30, 2014)

County: Kern

Result: Improved Family Functioning

Service: General Parenting Education and Family Support Programs

Provide the most recent compelling service outcome available for this service.

Differential Response (DR) incorporates comprehensive community support for child safety and family well-being in Kern County. The funding from First 5 Kern covers 30% of the DR budget and assists fund leveraging across seven agencies to expand Child Protective Services (CPS). Besides management of existing cases, DR ensures proper and prompt attention to suspected reports of child abuse and neglect. Upon receiving CPS referrals, service providers contact clients within 72 hours and make an in-home visit within 10 working days. Service outcomes are monitored through a well-rounded assessment of family conditions in eight domains of the North Carolina Family Assessment Scale-General (NCFAS-G). In FY2013-14, 1,920 children were case-managed, 73% of the families completed case plans, and 99% of the families indicated their satisfaction in an exit survey. The NCFAS-G results show consistent enhancements of family functioning and child well-being through DR services.

Provide the comparison data used to determine whether the service outcome was an improvement and specify the origin of the data.

Intake and exit scores from NCFAS-G are analyzed to determine family stability in more than 500 families. The value-added assessment indicates significant improvement of family environment [t(517)=15.54, p<.0001]; parental capability [t(515)=13.95, p<.0001]; family interaction [t(516)=13.11, p<.0001]; family safety [t(514)=12.25, p<.0001]; child well-being [t(509)=13.88, p<.0001]; social community life [t(516)=14.91, p<.0001]; self-sufficiency [t(511)=16.24, p<.0001]; and family health [t(512)=11.56, p<.0001]. Effect sizes are computed for outcome measures on the NCFAS-G scales, and strong practical impacts are found between pretest and posttest (Cohen's d>1.15). Across FY2013-14, families exiting DR show progress within each domain by an average of 51%, and 88% of the families demonstrate improvement in one or more domains.

Describe the measurement tool used in the evaluation to measure the outcome.

**Annual Report Form 2 (AR-2)
County Demographic Worksheet
for Fiscal Year 2013-2014 (July 1, 2013 - June 30, 2014)**

County: Kern
Result: Improved Child Development
Service: Kindergarten Transition Services

Provide the most recent compelling service outcome available for this service.

First 5 Kern funded “Supporting Parents and Children for School Readiness” at Bakersfield City School District (BCSD), the largest elementary school district in California. The BCSD program offered a broad scope of age-appropriate services, including home visitation, case management, developmental assessment, kindergarten summer camp, as well as center-based learning for both parents and children. In FY2013-14, the program assisted 30 children with health insurance enrollment, provided health screenings for 179 children, case-managed 114 families, delivered home-based education for 31 children, and provided group-based education for 509 parents and 147 children. In addition, 144 children enrolled in a Summer Bridge program to enhance school readiness. Built on its partnerships with 12 elementary schools, the BCSD program has established compelling results through family-focused, culturally-appropriate, and community-based services to support development of children ages 0-5.

Provide the comparison data used to determine whether the service outcome was an improvement and specify the origin of the data.

Ages and Stages Questionnaire-3 (ASQ-3) data are used to track child development during Months 2-60, and the results show performance of 397 children significantly above the corresponding thresholds in communication [t(396)=43.08, p<.0001]; gross motor [t(396)=54.10, p<.0001]; fine motor [t(396)=44.35, p<.0001]; problem solving [t(396)=47.96, p<.0001]; and personal-social [t(396)=51.79, p<.0001] domains. More than 92% of the children surpassed all ASQ-3 thresholds. Meanwhile, pretest and posttest data are gathered to assess effectiveness of the Nurturing Parenting Curriculum classes, and knowledge of child development has been significantly improved among 223 parents [t(222)=3.74, p=.0002]. The Summer Bridge program has also demonstrated significant improvement of cognitive [t(106)=5.80, p<.0001]; communication [t(106)=4.80, p<.0001]; self-help [t(106)=5.90, p<.0001]; social emotional [t(106)=10.89, p<.0001]; and fine motor [t(106)=8.04, p<.0001] skills among 107 children ages 4-5.

Describe the measurement tool used in the evaluation to measure the outcome.

Result: Improved Child Health

Service: Targeted Intensive Intervention for Identified Special Needs

Provide the most recent compelling service outcome available for this service.

Richardson Special Needs Collaborative (RSNC) offers both prevention and intervention services to address special needs of high-risk children ages 0-5 and their families. Preventative screening occurred for children ages 0-5, which was followed by program services through home visitation, case management, basic needs referrals, parent education, behavioral health support, and assistance for health insurance application. In FY2013-14, RSNC case-managed 73 families, provided parenting workshops and classes for 179 parents, and provided home-based parent education for 54 parents. Service outcomes are tracked for 72 children in need of immunization, physical exam, and/or dental care. Since intake, the number of cases with these needs dropped to 23 in midyear and 1 at the end of the year. In addition, the result tracking indicates that the number of children with unmet health needs, including vision care, hearing care, and health insurance, dropped to zero at the 12th month of service.

Provide the comparison data used to determine whether the service outcome was an improvement and specify the origin of the data.

Value-added assessments are adopted to evaluate the program impact at three levels: (1) The results at the child level show significantly less concerns on child health and safety [$t(137)=3.22$, $p=.0016$] between case intake and closing. During the same period, significant improvements have been found in child behavior [$t(137)=3.48$, $p=.0007$]; home environment [$t(137)=3.96$, $p=.0001$]; and academic performance [$t(137)=1.99$, $p=.0480$]. (2) At the parent level, pretest and posttest data are gathered to evaluate effectiveness of the Nurturing Parenting education and the results indicate significant improvements of parenting knowledge [$t(41)=9.12$, $p<.0001$] and skills [$t(41)=3.79$, $p=.0005$] in FY2013-14. (3) At the family level, RSNC services are provided in both English and Spanish, and the case management outcomes are tracked for 68 families. The number of families with unmet dental and eye care needs dropped from 19 at program intake to 1 in the 12th month.

Describe the measurement tool used in the evaluation to measure the outcome.

Student Behavior Assessment (SBA)
Nurturing Skills Competency Scale (NSCS)
Family Stability Rubric (FSR)

Result: Improved Systems of Care
Service: Public Education and Information

Who was the primary audience for the service?

- Children ages 0-5 and their families
- Rural families
- Community members and stakeholders

What were the types of services provided?

- Health screenings
- Public awareness: Safely Surrendered Baby campaign, Kaitlyn's Law campaign
- Baby supplies not available through other organizations: (e.g. car seats, diapers, pack 'n' plays etc.)

What was the intended result of the service? What was the community impact of the service?

- Increase knowledge on child health, as well as the capacity of medical and dental services for rural children and their families
- Increase community awareness of child abuse prevention and child safety in and around vehicles
- Address basic needs for infants

- Policy Impact of Evaluation Results

**Annual Report Form 3 (AR-3)
County Evaluation Summary
for Fiscal Year 2013-2014 (July 1, 2013 - June 30, 2014)**

County: Kern

Provide a description of the evaluation activities completed during the fiscal year

Overview evaluation activities directed by First 5 Kern

First 5 Kern used the Grant Evaluation and Management Solution (GEMS) system to support collection of evaluation data across 40 programs. Meanwhile, a new executive director, Roland Maier, was hired this year. During the leadership transition, consistency of data management has been maintained through quarterly reviews by the Institutional Review Board (IRB) at California State University, Bakersfield. Confidentiality trainings and site visits are conducted to ensure proper handling of evaluation activities at program sites. At the commission level, program officers of First 5 Kern held multiple meetings to discuss and address evaluation recommendations from last year. Professional development has been completed by First 5 Kern staff to enhance evaluation of parental education, child development, and child health programs.

Evaluation of Specific Initiatives

Program-specific results are evaluated in each focus area. In "Improved Child Health", the Bakersfield Adult School (BAS) Health Literacy Program offered health literacy training for parents, and a "Be Choosy Be Healthy" (BCBH) instrument was used to assess the program impact. In "Improved Family Functioning", 2-1-1 Kern County provided referral services to address a broad spectrum of family needs through phone calls and online queries. The referral counts have been tracked for children ages 0-5 and their families across adjacent years to evaluate the service expansion. In "Improved Child Development", Ready to Start (R2S) is a pre-kindergarten program to enhance child development in Kern County. Value-added assessment has been conducted to evaluate improvement of child performance in math, reading, and social skills.

Collection of Participant and Outcome Data

Participant data were tracked at the program level and submitted to First 5 Kern through GEMS. Specific programs, such as 2-1-1 Kern County and R2S, sent participant and outcome data directly to First 5 Kern. Depending on the service populations, data collections occurred at both child and family levels to support a comprehensive evaluation of program effectiveness. For populations receiving continuous services, data gathering includes articulation of additional information from the previous year to assess improvement of service quality on the time dimension.

Comparison of Results from Similar Programs

First 5 Kern funded similar programs in focus areas of "Improved Family Functioning" and "Improved Child Development". Comparisons of program results are supported by adoption of common instruments, such as Adult-Adolescent Parenting Inventory-2 (AAPI-2), Ages and Stages Questionnaire-3 (ASQ-3), Ages and Stages Questionnaire-Social Emotional (ASQ-SE), Child Assessment-Summer Bridge (CASB), Core Data Element (CDE) Survey, Desired Results Developmental Profile – Infant/Toddler (DRDP-IT), Desired Results Developmental Profile – Preschool (DRDP-PS), Family Stability Rubric (FSR), and Nurturing Skills Competency Scale (NSCS).

**Annual Report Form 3 (AR-3)
County Evaluation Summary
for Fiscal Year 2013-2014 (July 1, 2013 - June 30, 2014)**

County: Kern

Dissemination of Evaluation Findings in Professional Communities

In FY2013-14, First 5 Kern staff presented findings at the National Association for the Education of Young Children and Zero to Three's 28th National Training Institute annual meetings. They had another article reviewed and accepted for presentation at the 142nd annual meeting of American Public Health Association.

In summary, First 5 Kern followed the Statewide Evaluation Framework to collect both participant and outcome data from each focus area. The capacity building includes completion of professional training by staff members, such as Training of Trainer Workshops for NSCS in "Improved Family Functioning" and ASQ-3/ASQ-SE in "Improved Child Health", as well as access to the data from the Office of Statewide Health Planning and Development in "Improved Child Health".

Describe the evaluation findings reported during the fiscal year

Evaluation findings are reported below to highlight three sets of outcomes:

- (1) Intervention outcomes from special initiatives;
- (2) Evaluation results from comparable programs;
- (3) Process outcomes against baseline findings from the previous year.

The first two categories are designated to justify results-based accountability, and the last category is designed to support program enhancement.

Evaluation Findings from Specific Initiatives

BAS, 2-1-1 Kern County, and R2S employed program-specific data to evaluate service outcomes.

In FY2013-14, BCBH data were gathered from 40 parents to assess the impact of BAS parent education service. The results indicated improvement of health literacy in health, activity, eating, and prevention domains within six months of the BAS intervention.

In "Improved Family Functioning", 2-1-1 Kern County provided referrals for 10,393 unduplicated children ages 0-5, more than a 14% increase over last year. The program responded to additional calls from 602 unduplicated mothers during pregnancy.

In "Improved Child Development", the R2S Standard Test designated a total of 22 points to measure reading readiness, math readiness, and supportive skills. The mean score from 730 children increased from 14 to 20 within five weeks of Summer Bridge intervention.

Comparable Results across Similar Programs

Kern County is the third largest county in California according to land area. First 5 Kern incorporated AAPI-2, NSCS, ASQ-3, ASQ-SE, CASB, DRDP-IT, and DRDP-PS to evaluate similar

programs in different communities.

AAP1-2 data were gathered from seven programs to evaluate effectiveness of court-mandated parent education classes. Five programs demonstrated significant improvement of parental empathy toward child needs. The AAP1-2 results confirmed a positive impact on 110 families.

NSCS data indicated significant improvement of nurturing-parenting knowledge in 11 programs. The benchmark was aligned with the Nurturing Parenting curriculum, and the intervention positively impacted 557 parents.

ASQ-3 results were used by 20 programs to screen child development during Months 2-60. Development levels of 2,015 children were significantly above the corresponding thresholds in all ASQ-3 domains. Meanwhile, Women's Shelter Network showed above-threshold performance on the ASQ-SE scale for 59 children during Months 6-60.

CASB was used to assess 10 Summer Bridge programs that received funding from the School-Readiness Initiative in the past. Significant improvement in cognitive skills has been found among 307 children in all 10 programs.

DRDP-IT was employed to assess infant development in three programs. Despite the tracking of less than five children in each program, aggregated data showed significant child development on the DRDP-IT scales across three programs.

DRDP-PS data indicated significant skill developments in self and social development, language and literacy development, mathematical development, physical development, and health for 59 children in three programs.

Process Outcomes Surpassing the Baseline Results

As the program budget and scope of work remained stable over the past four years, CDE and FSR data are gathered to examine compelling outcomes beyond the baseline results from last year. FSR results showed improvement of family functioning in childcare, transportation, job support, and food supply across 12 or more programs. CDE data showed: (1) more parents receiving monthly prenatal care in 12 programs, (2) a higher rate of full-term pregnancy in 17 programs, (3) fewer cases of low birth weight and more cases of breastfeeding in 10 programs, (4) more parents read to children at least twice a week in 14 programs, and (5) more family support for preschool attendance in 14 programs.

In conclusion, evaluation findings indicate consistent program results and process outcomes to benefit children ages 0-5 and their families in all focus areas.

Describe the policy impact of the evaluation results

Ongoing policy changes since FY2012-13 State Annual Report: The commission continues to address the coordination and development of a local curriculum for the School Readiness Summer Bridge program. The project was divided into three stages: (1) planning, (2) development, and (3) implementation. As reported last year, the planning stage included collection of feedback from a focus group of service providers. In FY2013-14, First 5 Kern staff gathered input from the focus group at the development stage to begin drafting the curriculum and assessment. Implementation of the curriculum and assessment will occur during the FY2015-16.

Outcomes for FY2013-14 will be evaluated and reported in depth in the Local Annual Report. Commission actions or policy impacts will be discussed in next year's State Annual Report (2014-15).

In FY2013-14, the following policy changes were addressed based on findings and recommendations derived from the First 5 Kern Annual Report FY2012-13 completed by Dr. Wang:

(1) "Enhance alignment among the different levels of Result Indicators in the new Request for Proposals process" (p. 84): The 2013-14 Strategic Plan lists a total of 47 Result Indicators (RIs); however, not all are currently addressed by service providers. A total of 29 RIs are being addressed. The recommendation was "to differentiate three tiers of RIs, i.e., excepted RIs, implemented RIs, and achieved RIs" (p. 84). The three-tiered categorization will be implemented in the new funding cycle FY2015-20.

(2) "Revise the hierarchy between goals and objectives in the Strategic Plan" (p. 85): In collaboration with the Principal Investigator Dr. Wang, and the Evaluation and Program departments, the hierarchy between goals and objectives have been incorporated to assure alignment with the legislation in the FY2015-20 Strategic Plan.

(3) "Offer Nurturing Parenting curriculum training for the 18 service providers that employed NSCS outcomes to assess their program effectiveness" (p. 85): Analysis of the Nurturing Parenting pretest and posttest assessments demonstrated a variation in results among programs. To address the variation, the recommendation was to offer three days of training to enhance and strengthen the quality of the curriculum (p. 85). The Program and Evaluation departments reviewed several options to address this recommendation. Staff has attended the Training of Trainers workshop from the developers of the Nurturing Parenting curriculum to become certified Nurturing Parenting trainers. A three-day training will be instituted for local programs in the new funding cycle FY2015-20.
